SUMMARY

AI Automation Engineer with **3+ years of experience** turning **messy, unstructured business data** into AI tools, data pipelines, and dashboards **adopted company-wide**. A **one-stop solution from ideation to production**, leading programs with PM, operations, and finance and solving complex business problems.

EXPERIENCE

AI Engineer

Castillo Engineering, Orlando, FL

May 2024 – Present

- Cut engineering plan review time by **97%** (5 hours → 10 minutes) with an AI compliance tool on **OpenAI** and **Gemini Vision** (470+ rules), saving **\$150K+/year** in reviewer hours.
- Reduced engineering-document evaluation from **30 days to 7** by building **LLM pipelines** that extract and validate key project data, with a **human-in-the-loop** review for low-confidence results.
- Led **PMO 360**, a project-management platform for engineering teams (meetings, action items, change orders, proposals), from requirements to production on **FastAPI**, **React** and **PostgreSQL**. Adopted by **6 PM teams (120+ users)**, cutting weekly status reporting by **63%**.
- Shortened sales-proposal turnaround by **88%** (2 days → 6 hours) by building **interactive dashboards** with **API integrations** that pull databases, Excel sheets, and JSON files into one proposal view.
- Built scalable **PySpark** data pipelines to process **3 TB** of solar engineering data across **Delta Lake** and **Amazon Redshift**, enabling daily **Tableau** reporting and operational analytics.
- Built **C-suite Tableau dashboards** for **quarterly analytics**, from ideation to launch, tracking on-time planset delivery, permit approval times, and solar equipment lead times, protecting **\$80K+** in revenue.

AI Engineer

Genpact, Remote

Feb 2022 – Aug 2022

- Built automated **PySpark** and **Airflow** pipelines processing **100K+** vehicle-damage images and records.
- Improved dental X-ray detection accuracy by **18%** across **5 clinics** by building a **YOLOv5 + U-Net** model in **PyTorch**, with **statistical analysis** in **MATLAB**.

PROJECTS

PMO 360: Your All-Round PM Portal

[Demo](#)

Tracks every project from proposal and change orders to client delivery; AI turns meeting notes into tasks.

Gandalf: The Scheduling AI Wizard

[Demo](#)

Plans a team's week by skill, capacity, and deadline, with utilization dashboards and a chat copilot.

Planset QC: Compliance Automation

[Demo](#)

AI reviews electrical drawings against 470+ compliance rules in minutes instead of 5 hours.

SKILLS

AI & Automation: Python, OpenAI, Gemini, LLM agents, Computer Vision, PyTorch, MATLAB

Data & BI: SQL, Redshift, PySpark, Airflow, ETL, data modeling, forecasting, Tableau, Power BI

Cloud & DevOps: AWS (S3, EC2), Azure, Docker, GitHub Actions, FastAPI, React

EDUCATION & CERTIFICATIONS

M.S. Computer Science, University of Central Florida, 2024

GPA: **3.7/4.0**

AWS Certified Cloud Practitioner, Amazon Web Services

2024
